QUARTERLY JOURNAL

OF THE

Royal Meteorological Society

Editor :

F. PASQUILL

Vol. **90**, 1964

LONDON :
ROYAL METEOROLOGICAL SOCIETY
49 CROMWELL ROAD, LONDON, S.W.7
1964

CONTENTS OF VOLUME **90**

PAGE

J. SMAGORINSKY—Some aspects of the general circulation 1

J. R. PROBERT-JONES—An analysis of the fluctuations in the tropical stratospheric wind 15

W. M. PROTHEROE—The motion and structure of stellar shadow-band patterns (Plates I and II) 27

F. E. LUMB—The influence of cloud on hourly amounts of total solar radiation at the sea surface 43

J. K. ANGELL—Measurements of Lagrangian and Eulerian properties of turbulence at a height of 2,300 ft 57

J. A. DAY—Production of droplets and salt nuclei by bursting of air-bubble films (Plates III and IV) 72

Shorter Contributions—

F. PASQUILL and H. E. BUTLER—A note on determining the scale of turbulence .. 79

W. C. MACKLIN—Factors affecting the heat transfer from hailstones 84

J. LATHAM—The electrification of snowstorms and sandstorms 91

J. CLARK and W. HITSCHFELD—Heating rates due to ozone computed by the Curtis-Godson approximation 96

B. K. SEN-GUPTA—Waves in stratified media—Pt. III 101

Correspondence—

L. JACOBS and J. L. MONTEITH—The validity of solar radiation data for the British Isles 105

Discussions—

J. M. RICHARDS—The penetration of interfaces by cylindrical thermals (*Q.J.*, **89**, p. 254) 108

J. R. PROBERT-JONES—The radar equation in meteorology (*Q.J.*, **88**, p. 485) .. 108

R. S. SCORER—Cloud nomenclature (*Q.J.*, **89**, p. 248) 109

Proceedings at meetings of the Society 112

Reviews—

Cosmic rays, T. E. Cranshaw (N.C.B.); *Exploring the atmosphere*, G. M. B. Dobson (G.B.T.); *The sea*, Vol. 2, (Ed.) M. N. Hill (R.F.M.H.); *Handbook of meteorological instruments*, Pt. II (A.W.B.); *Antarctic research*, Maury Memorial Symposium (H.H.L.); *Environmental control of plant growth*, (Ed.) L. T. Evans (F.L.M.) 115

W. C. SWINBANK—The exponential wind profile 119

G. E. MCVEHIL—Wind and temperature profiles near the ground in stable stratification 136

H. A. PANOFSKY and A. A. TOWNSEND—Change of terrain roughness and the wind profile 147

P. M. SAUNDERS—Sea smoke and steam fog (Plate V) 156

S.-K. KAO and W. S. BULLOCK—Lagrangian and Eulerian correlations and energy spectra of geostrophic velocities 166

R. DIXON—The deepening of wave depressions in relation to geostrophic vorticity advection at 300 mb 175

Shorter Contributions—

Y. P. RAO—Interhemispheric circulation 190

P. GROEN—A simple formula for confluent or diffluent currents with special application to wind 194

P. B. MACCREADY, Jr. and H. R. JEX—Turbulent energy measurements by vanes .. 198

B. J. BRINKWORTH—Radiative transport properties of fogs 204

rrespondence—

J. E. Dinger; B. J. Mason—Electrification accompanying melting of ice and snow .. 208

J. Latham—The electrification of freezing water drops 209

cussions—

A. N. Dingle and K. R. Hardy—Description of rain by means of sequential raindrop-size distributions (*Q.J.*, **88**, p. 301) 212

K. A. Browning, F. H. Ludlam and W. C. Macklin—Density and structure of hailstones (*Q.J.*, **89**, p. 75) 213

W. C. Macklin and B. F. Ryan—The formation of spongy ice (*Q.J.*, **88**, p. 548) .. 215

ceedings at meetings of the Society 217

iews—

An introduction to atmospheric physics, R. G. Fleagle and J. A. Businger (J.T.H.); *Meteorology and climatology for sixth-forms and beyond*, E. S. Gates (D.C.L.); *Air chemistry and radioactivity*, C. E. Junge (P.G.); *Physics of lightning*, D. J. Malan (B.J.M.); *The physical geography of the sea and its meteorology*, M. F. Maury (J.R.T.); *Quellentexte zur Witterungsschichte Europas von der Zeitwende bis zum Jahre 1850 : Hydrographie*, Teil 4 (1701-1750), (G.M.); *World maps of climatology*, H. E. Landsberg, H. Lippmann, K. H. Paffen and C. Troll (G.A.B.); *Forest influences*, F.A.O., Rome (R.W.G.); *Meteorological Office Annual Report, 1962* (T.J.C.); *The Royal Society International Geophysical Year Antarctic Expedition, Halley Bay, 1955-1959*, (Ed.) Sir D. Brunt (H.H.L.) 220

ituary Notice 225

rrigendum 225

. Sawyer—Presidential Address – Meteorological analysis – a challenge for the future (Plate VI) 227

A. Townsend—Natural convection in water over an ice surface.. 248

P. Elliott—The height variation of vertical heat flux near the ground 260

Latham—Charge transfer associated with temperature gradients in ice crystals grown in a diffusion chamber 266

B. Matthews and B. J. Mason—Electrification produced by the rupture of large water drops in an electric field (Plates VII and VIII) 275

. Stewart—Precipitation from layer cloud 287

W. Sansom—The use of pressure tendencies as an aid to forecasting in East Africa 298

rter Contributions—

J .K. Angell—Correlations in the vertical component of the wind at heights of 600, 1,600 and 2,600 ft at Cardington 307

L. C. Chapas and A. R. Rees—Evaporation and evapotranspiration in Southern Nigeria 313

J. Glover and J. Forsgate—Transpiration from short grass 320

N. W. Hudson—Bearing and incidence of sub-tropical convective rainfall 325

R. Shapiro—A mid-latitude biennial oscillation in the variance of the surface-pressure distribution 328

T. J. Chandler—North-wall and Stevenson screen temperatures at Kew Observatory .. 332

R. A. Hamilton—Determination of ozone amounts by the Dobson spectrophotometer using the focused sun method 333

R. C. Smith—A derivation of the meridional velocity profile 338

rrespondence—

D. M. C. Thomas—Lagrangian and Eulerian properties of turbulence 342

W. Bleeker and R. S. Scorer—Cloud nomenclature 343

E. K. Webb—Ratio of spectrum and structure-function constants in the inertial subrange 344

cussions—

J. V. Dave, P. A. Sheppard and C. D. Walshaw—Ozone distribution and continuum from observations in the region of the 1,043 cm^{-1} band (*Q.J.*, **89**, p. 307) .. 347

R. N. Kulkarni—Comparison of ozone variations and of its distribution with height over middle latitudes of the two hemispheres (*Q.J.*, **88**, p. 522); Some ozone weather relationships in the middle latitudes of the Southern Hemisphere (*Q.J.*, **89**, p. 478) 348

Report of the Council for 1963 351

Proceedings at meetings of the Society 364

Reviews—

Jet-stream meteorology, E. R. Reiter (M.K.M.); *An introduction to the hydrodynamical methods of short-period weather forecasting*, A. Kibel (F.H.B.); *Arid Zone research : environmental physiology and psychology in arid conditions* U.N.E.S.C.O. (G.M.H.); *Medical biometeorology*, (Ed.) S. W. Tromp (W.C.T.); *Manual of barometry* (WBAN), Vol. **1** (W.E.K.M.); *A rainfall map of Eastern Africa and Southern Arabia*, J. F. Griffiths and C. F. Hemming (D.H.J.); *Thermodynamics of clouds*, L. Dufour and R. Defay (R.F.J.); *Keoeeit. The story of Aurora Borealis*, W. Petrie (J.P.); *Heat transfer in the soil*, A. F. Chudnovskii (J.L.M.). 366

Obituary Notice 371

J. D. Woods and B. J. Mason—Experimental determination of collection efficiencies for small water droplets in air 373

H. H. Lamb—Trees and climatic history in Scotland 382

J. S. Sawyer—Dynamical aspects of the bi-polar stratospheric circulation 395

G. B. Tucker—Zonal winds over the Equator 405

A. Eddy—The objective analysis of horizontal wind divergence fields 424

R. J. Reed—A tentative model of the 26-month oscillation 441

Shorter Contributions—

J. C. Kaimal, F. A. Record, J. E. Tillman, J. A. Businger and M. Miyake—Comparison of bivane and sonic techniques for measuring the vertical wind component .. 467

J. K. Angell—Some velocity and momentum-flux statistics derived from transosonde flights 472

J. H. Gee and D. R. Davies—A further note on horizontal dispersion from an instantaneous ground source 478

Correspondence—

J. M. Mitchell, Jr. and J. R. Probert-Jones—An analysis of the fluctuations in the tropical stratospheric wind 481

Discussions—

J. Briggs and W. T. Roach—Aircraft observations near jet streams (*Q.J.*, **89**, p. 225) .. 483

K. A. Browning and B. J. Mason—Production of ice crystals and electric charges by splintering of freezing droplets in thunderstorms (*Q.J.*, **89**, p. 139) 485

J. Latham—The electrification of frost deposits (*Q.J.*, **89**, p. 265) 486

D. G. Evans and W. C. A. Hutchinson—The electrification of freezing water droplets and of colliding ice particles (*Q.J.*, **89**, p. 370) 487

W. C. Swinbank—Long-wave radiation from clear skies (*Q.J.*, **89**, p. 339) 488

J. T. Houghton—Absorption in the stratosphere by some water-vapour lines in the ν_2 band (*Q.J.*, **89**, p. 332) 493

F. E. Lumb—The influence of cloud on hourly amounts of total solar radiation at the sea surface (*Q.J.*, **90**, p. 43) 493

G. W. Lennon—The identification of weather conditions as associated with the generation of major storm surges along the west coast of the British Isles (*Q.J.*, **89**, p. 381) 495

J. M. Craddock—Persistent temperature regimes at Kew (*Q.J.*, **89**, p. 461) 497

J. A. Day—Production of droplets and salt nuclei by the bursting of air-bubble films (*Q.J.*, **90**, p. 72) 498

Proceedings at meetings of the Society 499

Reviews—

International Auroral Atlas, I.U.G.G. (C.D.W.); *L'eau et la production végétale*, Inst. Nat. Res. Agronomique (G.S.); *Meteorology and the migration of the Desert Locust*, R. C. Rainey (A.G.F.); *Theory of satellite orbits in an atmosphere*, D. King-Hele (R.F.); *Physics of plant environment*, W. R. van Wijk (J.R.P.); *Cloud physics*, A. Kh. Khrgian (B.J.M.); *Sukhoveis and drought control*, B. L. Dzerdzeevskii (H.L.P.) 502
